Fire Life Safety & Building Solutions

Version 1.1  
May 2026 release

[rhinotek.ae](http://rhinotek.ae)

## Director's Vision

**Our vision is to cement Rhinotek as a trusted partner in fire life safety and building service solutions, across the UAE and wider GCC region.**

Having owned and operated both a property development company and a fire and life safety building solutions business, we understand the importance of partnering with a trusted provider who appreciates the full picture – quality, pricing, logistics, and delivery. Our focus is on providing reliable, innovative, and fully compliant life safety systems that safeguard people, protect assets, and preserve business continuity.

### **Our guiding principles are:**

- Life Safety First
- Engineering Excellence
- Innovation & Technical Advancement
- Operational Discipline
- A Sustainable Future

Through disciplined engineering practices, strategic global partnerships, and uncompromising quality standards, Rhinotek aims to elevate the standard of fire protection delivery across the region.

## About Rhinotek

Rhinotek is a specialized building services solution provider owned, operated and headquartered in the UAE, servicing a wider GCC and global markets.

### Our foundation is built on:

- 2 years of established operations within the UAE
- Over 30 years experience in Australia, New Zealand and China
- A 300,000 sq. ft. operational warehouse in Muwaileh Commercial, Sharjah
- A structured international sourcing network
- Dedicated R&D and system demonstration capabilities

Since commencing operations in the UAE, Rhinotek has grown into a reliable supply and technical partner for fire protection systems and engineering services.

Our investment in infrastructure includes an on-site R&D and building services facility, featuring a full functioning and integrated building services system. This facility enables collaborative engagement with consultants, contractors, authorities, and licensing agencies for testing, training, and system validation.

All products are engineered, sourced, and distributed under strict quality control protocols. Advanced warehousing, ordering, and dispatch systems ensure efficiency, traceability, and reliability across every project.

## Our Core Business

**Rhinotek delivers fire life safety and building solutions — from certified equipment sourcing through to installation, system integration, commissioning, and authority coordination.**

---

Our core strength lies in managing the complete fire protection delivery process. We combine global sourcing capability with technical oversight, documentation control, and compliance alignment to ensure every system meets consultant specifications and UAE Civil Defence requirements.

From initial technical review and submittal preparation to final testing, inspection, and handover, Rhinotek provides a structured, accountable, and performance-driven approach to life safety system delivery.

## Supply of Firefighting Systems

We manufacture certified, performance-tested firefighting equipment engineered in accordance with international standards and UAE Civil Defence requirements, including:

- Fire Pumps (End Suction, Horizontal Split Case, Vertical Turbine)
- Hydrant Systems
- Sprinkler Systems
- Foam Suppression Systems
- Clean Agent Systems (FM200, Novec, Inert Gas)
- Fire Hose Reels & Cabinets
- Landing Valves
- Fire Extinguishers
- Fire Blankets
- Valves
- Pipes & Fittings

## Supply of ELV & Fire Alarm Systems

We deliver fully compliant fire alarm and emergency communication systems designed for seamless integration and dependable emergency response performance, including:

- Addressable Fire Alarm Systems
- Voice Evacuation Systems
- PAVA Systems
- Central Battery Systems
- Central Monitoring Systems
- Fire-Rated Cables

All systems are supported with structured technical documentation, certification records, and submittal packages.

# Installation & Turnkey Project Delivery

**Our technical teams provide coordinated installation, system integration, and commissioning services aligned with consultant specifications and Civil Defence inspection protocols, including:**

- Fire Pump Installation & Alignment
- Hydrant & Sprinkler Network Installation
- Fire Alarm Programming & Integration
- Testing & Commissioning
- Industrial Heavy Machinery
- Portable Power Solutions
- Industrial Fixing Solutions
- Civil Defence Coordination & Inspection Support
- Complete Turnkey Fire Protection Solutions

Our approach ensures technical integrity from design intent through to operational readiness.

---

## Our Target Clients

**We partner with organizations that require technical precision, regulatory certainty, and dependable project execution.**

**Rhinotek serves:**

- Contractors
- Engineering Consultants
- Developers
- Government Authorities
- Industrial & Commercial End Users

Our engagement model adapts to project complexity, stakeholder structure, and regulatory requirements — ensuring alignment at every stage of delivery.

## Compliance & Standards

Regulatory compliance and certification transparency are fundamental to our operations.

---

**All systems supplied and installed conform to:**

- National Fire Protection Association (NFPA)
- UAE Civil Defence Requirements
- International Fire Codes
- British Standards (BS)
- UL / FM / LPCB / Kitemark Certifications

We maintain strict documentation accuracy, traceability, and approval readiness to support consultant review and authority inspections.

## Our Competitive Advantage

Rhinotek combines global sourcing and manufacturing capability with structured technical oversight to deliver compliant, commercially sound, and reliable fire protection systems.

### Our strengths include:

- Coordinated end-to-end product sourcing
- Structured international supply chain (UAE, UK, Spain, Italy, China, Korea, Malaysia, Vietnam, Bangladesh & Australia)
- Competitive procurement strategy without compromising certification integrity
- Reliable material availability and logistics coordination
- Technical documentation and submittal preparation support
- BOQ compliance review and alignment assistance
- Flexible supply-only or turnkey delivery models
- Structured after-sales and maintenance support
- On-site R&D and demonstration facility

Our integrated model reduces procurement complexity, strengthens compliance assurance, and supports efficient project execution.

## Our Market Position

**Rhinotek operates as a reliable fire protection partner — not merely a supplier.**

**We bridge:**

- International manufacturing capability
- Consultant specifications
- Contractor execution requirements
- UAE Civil Defence approval frameworks

Our role is to ensure system integrity across the entire fire protection lifecycle.

---

## Project Categories Served

**Rhinotek supports a diverse portfolio of developments, including:**

- Residential Towers
- Commercial Buildings
- Industrial Facilities
- Warehousing & Logistics Hubs
- Retail & Shopping Centres
- Educational Institutions
- Healthcare Facilities
- Hospitality Developments
- Educational institutions
- Oil & Gas
- Healthcare Facilities

Each sector benefits from our structured engineering and compliance-led approach.

## Mission Statement

**At Rhinotek, our mission is to protect lives and property by delivering technically engineered, fully compliant fire protection systems across the UAE.**

**We are committed to:**

- Upholding international engineering standards
- Maintaining strong global sourcing partnerships
- Ensuring regulatory alignment across all projects
- Delivering innovative, reliable life safety solutions
- Building long-term client relationships
- Contributing to safer built environments across the GCC

---

## Our Investment in the UAE

**Rhinotek is proudly 100% UAE-owned and operated.**

All personnel undergo structured training at manufacturer facilities across Australia, Europe, and Asia to ensure product-specific expertise and system-level understanding.

Quarterly internal and third-party ISO inspections, alongside batch testing procedures, maintain consistent quality across our global manufacturing network.

Our team comprises internationally experienced engineers, managers, and technical specialists dedicated to delivering innovative and dependable fire protection solutions within the UAE market.
